

Company Profile

“To be the best leading IT Professional services who deliver the best price performance and consulting services in Thailand”

As today's technology is thrusting in an incredible speed enabling entrepreneurs to expand their business onto global stage, exposing their products to plethora potentials.

Fundamentally, one important factor forcing business organizations to maintain its efficient and profitable operations is to have an effective computerized infrastructure as a mainstream facility.

By a long-term commitment **Vintcom Technology Co., Ltd.** was established as a joint venture company between Vnet Capital Co., Ltd. and The Value Systems Co., Ltd. with shareholding of 85% and 15% respectively. With the intention of being the leading IT Professional service that sharpens in target market and delivers the best price performance and consulting services in Thailand. Initially, Vintcom Technology has been authorized by SUN Microsystems (Thailand) to be an enterprise distributor of SUN Microsystems product on June 2001. As “Oracle” had acquired SUN Microsystems, we are on processing to eventually be Oracle's Value Added Distributor. As to ensure providing our clients with the greatest quality IT services. We are working closely with Oracle Sun expertise IT Team along with the definite specialist partners in each industry segmentation such as Hitachi, F5, Riverbed, BCP Asia, WildPackets, ADTRAN, Symantec and our related company in Singapore - ECS Asia, etc. Moreover, we also mainly focus on our high caliber teams that have to be certified by Oracle Sun, and others as the Hardware and Software specialist. In order to reinforce the smooth service with effectiveness and efficiency along with the training to help our customer design, develop and implement best of the breed IT solutions on Oracle Sun platforms.

Besides, we also capitalizes out alliance with International Software Vendors (ISV), System Integrators (SIs) and other leading IT consulting firms to bring robust and reliable IT solution to our customers.

With wide range of experience and expertise that not only specialized to offer the most complete range of cutting-edge Information Technology Solution. We are confident that through our comprehensive expertise and services will be able to achieve customers' most demanding requirements in order to enhance their business strategy with the best price-performance and reliable IT solutions to be their first choice of IT solution partners.

ORACLE

Oracle

Oracle provides its customers with a more complete, open, and integrated software solution. Now, with the addition of Sun's servers, storage, SPARC, and software technologies such as Solaris, MySQL, and Java, Oracle's portfolio has evolved.

Sun servers

provide the performance, scalability, and cost-effectiveness that meet your requirements in technical computing, virtualization, and eco- and energy-efficient design.

Sun Storage

Oracle's Sun end-to-end storage solution includes advanced software and hardware, integration of Flash technology, and leading expertise in long-term information management and retention-as well as a fully unified storage and disk portfolio.

Oracle Database

Oracle Database- the world's first commercial relational database, as well as the first relational database for grid computing- helps ensure that enterprise information is always available and secure

Oracle Fusion Middleware

Oracle Fusion Middleware consolidates Oracle's leading, standards-based software to deliver "hot-pluggable" middleware with a comprehensive, seamlessly integrated, service-oriented-architecture software infrastructure.

HITACHI

Inspire the Next

©Hitachi Data Systems **Hitachi Data Systems**

Hitachi Data Systems helps organizations transform raw data into valuable information by making it more accessible and simpler to manage. Our vision is that IT must be virtualized, automated, cloud-ready and sustainable. Hitachi Data Systems provides best-in-class information technologies, services and solutions that deliver compelling customer ROI, unmatched return on assets (ROA) and demonstrable business impact. As the leader in storage virtualization, only Hitachi Data Systems offers a common, virtualized platform for all data and information.

The challenge for global businesses is to make information both available and secure. Our solutions manage data growth while they collect and connect data to create valuable information. They cut costs, reduce operational complexity and improve IT agility. They let people access, share and secure information. They help organizations innovate, collaborate and grow.

We combine our systems, software and expertise to meet the needs and budgets of the most demanding companies. Our applications include end-to-end virtualization, massive consolidation, data replication, archival solutions and the ability to scale up and scale out as business objectives require. Our solutions enable broad heterogeneous storage management, business continuity, backup and recovery, performance enhancement, data migration and data lifecycle management.

With more than 4,200 employees worldwide, Hitachi Data Systems does business in more than 100 countries and regions. Hitachi Data Systems is trusted by the world's leading enterprises, including more than 80 percent of the Fortune Global 100. Hitachi Data Systems believes that data drives our world - and information is the new currency.

F5

F5 is the global leader in application delivery networking, enabling our customers to increase business efficiency by leveraging the power of virtualization throughout the enterprise.

Our solutions optimize network, server, and storage environments ensuring the highest Levels of performance, security, and availability at the lowest possible cost. In addition, F5 facilitates IT growth and agility by eliminating physical constraints and automating routine processes.

We welcome you to join the tens of thousands of enthusiastic F5 customers who are discovering new and more powerful uses for our solutions every day.

Riverbed

Riverbed Technology is the pioneer and, with over 4,500 customers, the worldwide technology and market share leader in wide-area data services (WDS).

Riverbed provides the first and only comprehensive WDS solution to a host of severe problems that have effectively prevented enterprises from sharing applications and data across wide areas.

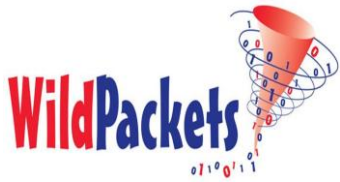

Riverbed's award-winning Steelhead WDS appliances address all of the issues that affect application performance over the WAN, dramatically improving the performance of applications that companies and knowledge workers rely on every day - including file sharing, email, backup, document management systems, IT tools, as well as ERP and CRM solutions. With Riverbed, any of these applications can be accelerated somewhere between 5 and 50, and even up to 100 times faster.
